

YOU CAN'T ALWAYS BRING YOUR WASHING HOME SO . . .

- Separate your washing into white, lights and darks reading the labels to ensure there is nothing that is handwash or dry clean only.
- Turn on the machine and put your washing into the drum make sure you don't overload it, or the clothes won't wash properly, but do aim to have a full load so it is more efficient.
- Add the detergent (and fabric softener if you are using it) to the drum or drawer if using powder. Follow the instructions on the packet if you are using another type of detergent.
- Shut the door and select your cycle. Unless you are washing bedding and towels (wash at least 40° and wash weekly) then 30° (this is also cheaper) will be fine.
- Some items need to be washed after every use e.g. underwear, workout kit, swimwear, whilst others can possibly cope with a couple of wears . . . if in doubt use your nose!
- If there is an Eco mode, use it. The wash may take a little longer but it will use less water and electricity, costing you less money on bills!
- Check the energy tariff of where you are staying, if it's cheaper do all the washing at night, if there are solar panels do all the washing during the day (the sunnier the better).
- Remember to remove from the machine as soon as it's finished.
- Shake out before drying and dry as naturally as possible.
- Drying outdoors is best to reduce the risk of damp and condensation.

LAUNDRY GUIDE

WASHING

	Machine wash permittel		Machine wash gentle		Hand wash		Do not wring		Wring
	Wash at or below 30°C		Wash at or below 40°C		Wash at or below 50°C		Wash at or below 60°C		Wash at or below 70°C
	Wash at or below 95°C		Wash at or below 40°C		Wash at or below 50°C		Wash at or below 60°C		Wash at or below 70°C

DRYING

	Natural dry		Do not dry		Line dry		Dry flat		Drip dry
	Tumble dry, normal		Tumble dry, low heat		Tumble dry, medium heat		Tumble dry, high heat		Tumble dry, no heat
	Tumble dry, gentle		Tumble dry, very gentle		Line dry in shade		Dry flat in shade		Drip dry in shade

IRONING

	Iron		Do not iron		Iron at low temperature		Iron at medium temperature		Iron at high temperature		Steam		Do not steam
--	------	--	-------------	--	-------------------------	--	----------------------------	--	--------------------------	--	-------	--	--------------

CLEANING

	Dry clean		Do not dry clean		Dry clean, any solvent		Dry clean, hydrocarbon solvent only		Gentle dry clean, hydrocarbon solvent only		Very gentle dry clean, hydrocarbon solvent only		Dry clean with PCE		Gentle dry clean with PCE		Very gentle dry clean with PCE
	Dry clean, short cycle		Dry clean, reduced moisture		Dry clean, low heat		Dry clean, no steam		Wet clean		Do not wet clean		Gentle wet clean		Very gentle wet clean		Very gentle dry clean with PCE

BLEACHING

	Bleach		Do not bleach		Chlorine bleach		Non-chlorine bleach		Non-chlorine bleach
